

## Senior Manager – Statistics / Data Science

Data Analysis Australia is seeking a Senior Manager to join its Data Science and Statistical consulting team.

Established in 1988, our purpose is to help **organisations make great decisions and new discoveries by making data meaningful**. We have worked on over 1,600 projects with hundreds of government and private clients locally, nationally and internationally, building a reputation of trust and delivery in all that we do.

Data Analysis Australia is a well-respected consulting firm in Western Australia. The successful applicant will be joining an agile business offering a variety of projects across multiple industries. With a friendly and dedicated team, Data Analysis Australia offers an environment in which to grow your career whilst providing genuine work-life balance.

This is an exciting opportunity to be part of the Senior Management team shaping the future of the organisation.

The available role is a full time, permanent position.

### Role description

Contribute to the management and growth of Data Analysis Australia, including business development and sales, applying and sharing knowledge, project management and delivery, staff management and other management duties as part of the Senior Management Team.

The type of work undertaken will include:

- Leading and delivery of data analytics projects;
- Contributing to the strategic direction of the company;
- Project design and methodology development;
- Management and analysis of data;
- Consulting with clients from a variety of industries;
- Leading marketing activities;
- Project management;
- Training/mentoring of staff; and
- Line management of consultants

## Selection Criteria

### Essential

- Demonstrated experience in statistical analysis and/or modelling in a commercial environment.
- Demonstrated ability to complete data analytic projects to a high standard within given deadlines and allotted time/budget, including the ability to manage multiple projects with competing deadlines.
- Demonstrated ability to bring in sales and new clients within the Data Science / Statistics area.
- At least 5 years' experience working in consulting or commercial organisations within Data Science or Statistics.
- Well networked in Perth or interstate in the Data Science / Statistics industry.
- Strong stakeholder management and communication skills, with the ability to influence and build relationships with executives and other senior stakeholders.
- Demonstrated experience in people management and development of staff.
- Demonstrated ability to identify key issues or core problems and devise practical and commercially sound solutions.
- Formal qualifications in Statistics, Mathematics, Data Science or another relevant degree.

### Desirable

- Skills and experience in any of computing, big data solutions, survey sampling, forecasting.
- Skills relevant to a small business organisation

### How to Apply

Applications must include:

1. Covering letter addressing the selection criteria above; and
2. Current CV, including details of eligibility to work in Australia and Citizenship status.
